

ELEVATED EMBROIDERY FOR THE DIGITAL AGE

DIRECT TO EMBROIDERY

Integrate even more options for decoration into your shop with the GTX and GTXpro series printers enabled with direct to embroidery capabilities. DTE aligns embroidery with the rest of the design's print file, utilizing a high resolution camera for highly precise application of the design.

DIRECT TO EMBROIDERY FEATURES:

- Compatibility with the GTX-422 and all GTXpro series printers
- Functions independently of embroidery machines, no matter the model
- Print high-quality, full-color detailed designs on top of white thread
- User-friendly software

SEE IT IN ACTION!

ABOUT THE DTE PROCESS:

Stitch the embroidery design in white thread and pretreat fabric

Use the software to align the embroidery with print file

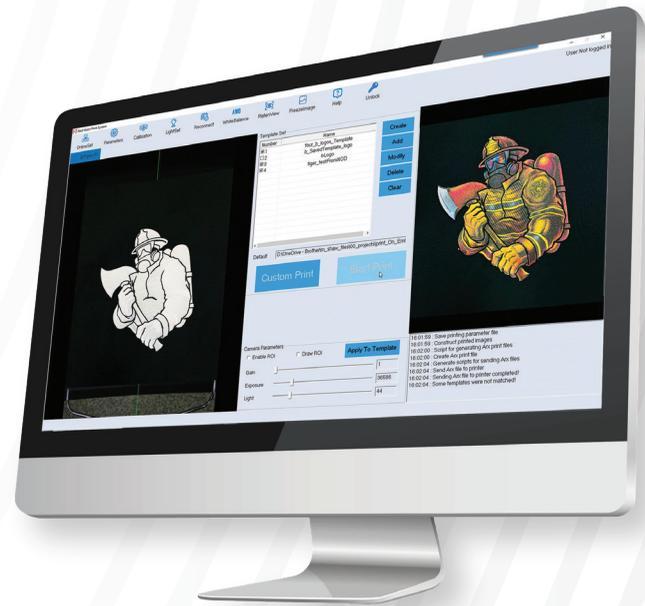

Load the print file on the GTXpro series & print

Cure the digital print with a conveyor dryer

DTE SOFTWARE

The DTE software is easy to use and only requires a simple calibration before printing. Using your embroidery design file, create templates within the software and select from preset print settings before you begin. Once ready to print, the camera automatically recognizes the embroidery design and aligns the artwork design for accurate printing.
